EE&T Undergraduate Lecture Series Talk
“Pursuing a career in audio signal processing?
Sounds good!”

presented by Tim Neal
Senior DSP Engineer
at Dolby

Tim completed his studies in electrical engineering at UNSW in 2001 with first class honours and the university medal. He commenced his career in the rigorous medical device industry at Cochlear Ltd.

Tim focused on signal processing technology development, gaining experience in algorithm design and implementation through to subjective testing with users. In 2008 Tim took up a position at Dolby Laboratories in Sydney working in the fast-paced world of consumer electronics. Tim currently manages the Voice Advanced Development team for Dolby, developing new technology in the area of

business communications. He is enjoying the challenge of blending technology leadership and strategy with building a world class high performing team
